

RAHUL MAHASETH

Full Stack Engineer | AI Systems Enthusiast | Scalable Product Builder

📍 Andhra Pradesh, India | ✉ rahulmahaseth700@gmail.com | 📞 +91-9234726899 | 🔗 LinkedIn | 🐙 GitHub

Engineer focused on building production-ready systems with strong foundations in full-stack development, AI-driven applications, scalable backend architectures, and performance optimization.

EDUCATION

SRM University AP

B.Tech in Computer Science Engineering

2023 – Present

CGPA: 8.05

TECH STACK

Languages: Java, JavaScript (ES6+), Python, C++

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, Django, REST APIs

Databases: MySQL, MongoDB, PostgreSQL

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools: Git, Docker, Linux, Postman

EXPERIENCE

Virtual Research Intern

Apr 2025 – Jul 2025

Universiti Teknologi PETRONAS, Malaysia

- Built **Spelling Scramble**, a cross-platform vocabulary learning platform using **Flutter, Dart, Provider, and Audio-Players** with support for **370K+ English words**.
- Designed and implemented real-time gameplay workflows including word validation, timer-based rounds, scoring systems, state management, and interactive UI components for smooth user interaction.
- Delivered responsive gameplay with optimized rendering and asynchronous processing, improving application stability and real-time performance across Android devices.

PROJECTS

Multimodal Biometric Authentication System (AI / DL)

[GitHub]

- Built an AI-powered biometric authentication system using **Python, ResNet-18, Siamese CNN, OpenCV, and Deep Learning** for secure real-time identity verification.
- Developed multi-modal authentication workflows including biometric preprocessing, feature extraction, pattern recognition, and verification pipelines for secure access control.
- Achieved **99.99%+ accuracy** with **0.006% EER** while maintaining inference latency below **1 second** for fast real-time authentication.

Flight Booking System (Full Stack)

[GitHub]

- Built a full-stack flight reservation platform using **Django, PostgreSQL, HTML, CSS, and JavaScript** supporting booking workflows and scheduling systems.
- Developed booking workflows, backend APIs, database relationships, and frontend interfaces to manage dynamic flight scheduling and passenger reservations.
- Optimized backend workflows and improved concurrent booking handling for efficient flight reservation processing

TriviaTrek (React Quiz Platform)

[GitHub]

- Built an interactive quiz platform using **React.js, REST APIs, JavaScript, React Router, and MongoDB** with leaderboard functionality and dynamic question management.
- Developed a gamified quiz platform workflow with category-based progression, MCQ validation, leaderboard tracking, score management, and responsive multi-page navigation using React.js and REST APIs.
- Reduced unnecessary re-renders, improving application responsiveness and delivering smoother user interaction

ACHIEVEMENTS

- Selected as a **Top Finalist Team** among **400+ teams** for an AI-based waste solution at a national-level hackathon.
- Achieved **541 Rank** in the PW Skills Coding Contest, showcasing strong problem-solving and programming skills.
- Solved **100+ DSA problems** on LeetCode, improving problem-solving skills and algorithmic thinking.

CERTIFICATIONS

- **Oracle Certified Professional: Java 17 Developer** – Oracle | Built strong foundations in Java, OOP, and backend development.
- **MongoDB Certified Associate Developer** – MongoDB | Gained expertise in CRUD operations, indexing, and scalable database systems.
